

LEDsBIKE X REAR

Intelligent brake light

For greater visibility in road traffic

Flashing mode

For enhanced visibility and longer battery life

Be seen – day and night **Not available in Germany**

The intelligent LED rear light with brake light function combines modern design with functionality. Three modes give you full control: automatic mode for intelligent adjustment, continuous light for constant visibility and flashing light for enhanced visibility. No matter which mode you choose, the integrated brake light is always active. An integrated sensor instantly detects braking and alerts traffic behind you with a bright flash.

With up to 17 hours of battery life and only two hours of charging time via USB-C, you're always ready for your next ride. In addition, a charging indicator lets you know when it's time to recharge. The slim, lightweight design fits perfectly on any bike. Thanks to the flexible mount, installation is quick, easy and tool-free. And because adventures don't end when the sun goes down, the rear light is IP54-rated for protection against water and dirt.

Backed by a 2-year OSRAM guarantee¹⁾, it's the ideal choice for cyclists who want more than just light: safety, comfort and a design that impresses.
